Mechanics on Preenlistment and Ranking

- **Maximum Number of Classes that can be Desired**
  Students can add up to 20 classes to the list of their desired classes.

- **Not Automatically Granted**
  Classes that you select in this module are **not automatically granted to you.** You will need to wait for the batch processing (or more commonly known as the **batch run**) to see if you get a slot in these classes.

- **Random Assignment**
  Class slots are assigned / granted **randomly**. As such, if there are 25 slots to a class and the demand for that class is 100, a student's chance to get into that class is 25/100 or 1 in 4.

- **Priority**
  The only way for a student to get a better chance of securing a slot in a class is to be given **preenlistment priority**. Priority is given to freshmen, graduating students (i.e., those in their final semester), and registration assistants.

  Your preenlistment priority status is displayed on the first screen when you log in. If your priority is "REGULAR" and you think you should have a higher priority, please go to your college to have it updated.

- **Ranking**
  The ranking feature allows you to specify which class you prefer more, mainly for resolving conflicts and excess units. This does not mean, however, that you would get a better chance of getting a slot in a class that you ranked highly than those who ranked the same class lower.

- **Conflicts**
  There are two types of class conflict: overlapping schedules and same subjects. Since this preenlistment module allows you to include as many as 20 classes in your list of desired classes, there will be instances during the batch run when you get chosen for slots in conflicting classes. When this happens, the system will check the class ranking you specified and **automatically cancel your slot in the lower-ranked class** so as to keep your slot in the conflicting higher ranked class.

- **Maximum Number of Units that can be Granted**
  During regular terms, the batch run grants up to 21 units for Undergraduate students, and up to 12 units for Graduate students. For the Midyear term, the batch run grants up to 8 units for Undergraduate students, and up to 6 units for Graduate students.

- **Maximum Number of PE Classes that can be Granted**
  The batch run can grant up to 2 PE classes to Graduating students, and 1 PE class to all other students.
